

U. S. REPRESENTATIVE DISTRICT #2

Rick Larsen	Democrat
Citizens to Elect Rick Larsen PO Box 326 Everett, WA 98206	Phone: 425.259.1866 Email: rick@ricklarsen.org Website: ricklarsen.org

Congressman Rick Larsen has represented our area in Congress for over five years. Rick was born and raised in Arlington, and his family has called Northwest Washington home for 104 years.

Rick is a member of the House Armed Services Committee and strongly supports our troops. He is fighting to make sure our troops have the equipment and support needed to do the job we have asked them to do. He is leading efforts to protect Naval Air Station Whidbey and Naval Station Everett and position them for future national security missions. Additionally, border security is a top priority. Rick secured funding to triple the number of border patrol agents for our district.

Congressman Larsen is also dedicated to building a culture of hope for those in need — including our communities struggling to fight methamphetamine and our veterans.

Rick Larsen is working with local law enforcement to ensure it has resources to stop methamphetamine use and production in our communities. He wants a government that fights methamphetamine use with the same sense of urgency as local law enforcement and our community leaders.

Veterans' health care must be closer to veterans. Rick is working with local veterans to build a new outpatient-based clinic in our area so that veterans needing critical health care do not have to travel to Seattle.

In Congress, Rick is working for affordable and reliable electricity rates that will keep jobs at the Alcoa Aluminum plant in Ferndale and Kimberly-Clark in Everett. Additionally, Rick helped the Snohomish County Public Utility District fight and win a judgment against Enron and saved taxpayers over 100 million dollars in bogus energy charges. As a member of the Transportation and Infrastructure Committee, Rick secures funding for critical traffic projects, like safety improvements on Highway 2.

Please vote for Rick Larsen.
