Personal Views: I am committed to the idea that government should only do for us what we can not do for ourselves. That means a smaller government. I promise to do everything I can to insure government makes it easier to start a business, run a business, or hire employees. I will do everything I can to insure our military is strong and well equipped to always protect us, including keeping the promises made to our veterans. I am committed to securing our borders. This we must do before we can begin to solve the immigration crisis. I will work to bring us to total energy independence by developing energy alternatives while remaining environmentally responsible. I swore to uphold and defend the Constitution of the United States against all enemies, foreign and domestic. I have not forgotten that oath which is why I want your vote for congress.
