

WHAT THEY ARE SAYING: SENATE APPROVES LANDMARK ONE BIG BEAUTIFUL BILL

July 1, 2025

The Senate delivered a resounding victory for American workers, farmers, and small businesses by [passing](#) President Donald J. Trump's One Big Beautiful Bill — a transformative legislative package that locks in historic tax relief, delivers border security, reforms welfare, funds critical infrastructure, and more.

Industry leaders and stakeholders nationwide hailed the Senate's vote and called on the House to swiftly send the bill to President Trump's desk:

[Airlines for America](#): "We are grateful that the Senate understands the urgent need to overhaul our nation's air traffic control (ATC) system and included \$12.5 billion in their reconciliation package for that cause. This is an important first step as Secretary Duffy works to implement President Trump's vision of a brand new, state-of-the-art system. We especially appreciate Commerce Committee Chairman Ted Cruz for his long-time dedication to the safety and efficiency of our nation's airspace. We urge the House of Representatives to quickly pass this legislation so President Trump can sign the One Big Beautiful Bill into law, begin the work of upgrading our ATC system and revitalize our airspace."

[America's Credit Unions President and CEO Jim Nussle](#): "We thank the U.S. Senate for securing the credit union not-for-profit tax status and not adding a new tax on 142 million credit union members as part of H.R. 1. Hard working Americans and their communities rely on the competitive rates and personally tailored services offered by credit unions to achieve their American Dream. By preserving the credit union tax status, it provides consumers across the country with more opportunities to achieve financial freedom."

American Airlines: “American Airlines strongly supports the much-needed funding to bolster and modernize our air traffic control system in the Senate reconciliation bill. In addition to staffing challenges, the U.S. air traffic control system’s technology and infrastructure have fallen behind much of the world. As President Trump and Secretary Duffy urgently work to build a state-of-the-art air traffic control system, this down payment is an essential first step in making aviation even safer and more efficient. The reconciliation bill also extends other key pro-growth tax policies that provide businesses with the necessary certainty to continue driving the economy. We urge the House to move swiftly and pass the bill.”

[American Farm Bureau Federation President Zippy Duvall:](#) “Farm Bureau applauds the U.S. Senate for passing the reconciliation package. Farmers and ranchers are the foundation of America’s food supply chain, and they need the certainty that this legislation will provide. Improvements to farm safety net programs that reflect today’s agricultural economy and maintaining important tax provisions will directly benefit farm and ranch families ... Important tax provisions will also help farmers save money that can be used to pay bills, invest in new technologies, and pass the family farm to the next generation. We now urge the House to pass the bill and get it to the president’s desk for his signature to ensure America’s farmers and ranchers can continue putting food on the table for America’s families.”

[American Federation for Children CEO Tommy Schultz:](#) “The mission is clear: deliver school choice to every state in America. Today’s vote marks a monumental step toward that goal for the first time in history ... We are eager to see President Trump sign school choice into law!”

[American Hotel & Lodging Association President and CEO Rosanna Maietta:](#) “AHLA applauds the Senate’s swift action today to prevent major tax increases on both hotel employees and businesses. The tax provisions included in the Senate bill provide small business hotel owners with the level of certainty they need to effectively operate amidst tremendous uncertainty resulting from years of inflation, trade impacts, and a softening of demand within the broader travel sector. We commend Majority Leader Thune, Senator Crapo, and other Senate champions for securing passage. We urge Congress to swiftly get this package to the President’s desk for his signature to help put businesses back on a pro-growth footing.”

[American Iron and Steel Institute President and CEO Kevin Dempsey:](#) “Capital investment is crucial for economic growth and job creation in the American steel industry and the manufacturing sector as a whole. Many of the key capital cost recovery provisions of the 2017 tax law have expired or are being phased out. Restoring these provisions is essential to ensuring that many companies will be able to make new investments in steel-intensive facilities and machinery. We applaud Senate passage of this legislation which will permanently

restore key provisions that have a proven record of fueling innovation and economic growth, including 100 percent bonus depreciation for business investment, immediate expensing for domestic research and development expenses and the EBITDA-based limitation on business net interest deductions. We urge the House to pass this bill and send it to President Trump this week so that he can sign it into law as soon as possible.”

[American Petroleum Institute President and CEO Mike Sommers](#): “We applaud the Senate for passing the One Big Beautiful Bill to bolster America’s energy advantage and support economic growth. This historic legislation will help usher in a new era of energy dominance by unlocking opportunities for investment, opening lease sales and expanding access to oil and natural gas development. We will continue to work with policymakers to get this final package to President Trump’s desk.”

[American Soybean Association President Caleb Ragland](#): “ASA applauds the Senate for its support of agriculture and the farm economy in this legislation. Soybean growers have long championed comprehensive revisions to the 45Z Clean Fuel Production Credit, an improved safety net for agriculture, and increased support for research and market expansion. The modified biofuel tax credits, enhancements to crop insurance and support for MAP and FMD, among other agriculture provisions included in this legislation will support U.S. farmers and expand market opportunities domestically. ASA urges the House to maintain these key agricultural provisions that support our rural economies as they consider this legislation.”

[American Trucking Association SVP of Legislative Affairs Henry Hanscom](#): “The American Trucking Association is grateful to Senate Republicans for their hard work to craft a package that will guarantee tax certainty for our nation’s trucking companies. Trucking is the backbone of our economy, employing over 8.5 million Americans in companies that range in size from one-truck operators and small family businesses to enterprise carriers. Enacting pro-business, pro-growth tax policies will ensure that all of those companies are able to better plan for the future, invest in their workforce and equipment, and move freight safely and efficiently. As the industry that moves 72% of America’s freight by tonnage, and that is the sole source of freight services for more than 80% of American communities, ATA looks forward to President Trump signing this measure into law as soon as possible.”

[Americans for Prosperity Chief Government Affairs Officer Brent Gardner](#): “We are so close to delivering a generational win to Americans by making pro-growth tax policy permanent. When we pass this bill, job creators and families will have the certainty they need to invest in their businesses and futures, reigniting the American Dream. We are encouraged by the thoughtful and productive discussions that have brought this legislation back to the House and urge

members to pass it expeditiously to ensure that Americans start reaping the benefits of this transformative legislation as soon as possible ... It's time to get this bill to the Oval Office for President Trump's signature. We're at the goal line, it's time to punch it in. Let's fulfill all those campaign promises and secure this victory for hardworking American taxpayers."

[Associated Builders and Contractors VP of Government Affairs Kristen Swearingen](#): "Tax certainty and pro-growth policies are not abstract policy goals for construction businesses—they are the foundation that allows ABC members to invest, grow and keep America building. We thank the Senate for passing this important legislation and urge the U.S. House of Representative to take swift action to send it to the president's desk."

[Associated Equipment Distributors President and CEO Brian P. McGuire](#): "By permanently extending and restoring pro-growth, capital investment incentivizing tax policies, the Senate is ensuring long-term tax code certainty that will benefit the equipment sector and the broader economy. AED applauds Senate Majority Leader John Thune and his team for heeding our call for tax permanence, and we urge the House to pass this legislation and send it to the president's desk expeditiously."

[Association of Equipment Manufacturers SVP of Government and Industry Relations Kip Eideberg](#): "The Association of Equipment Manufacturers applauds the U.S. Senate's passage of the One Big Beautiful Bill (OB BB) Act — a historic bill that will strengthen U.S. manufacturing, providing the certainty in the tax code necessary for equipment manufacturers to innovate, invest, and create more family-sustaining jobs right here in America. By extending and expanding the tax reforms from 2017, the OB BB will help equipment manufacturers build more in America, while also bolstering our global competitiveness. We commend Leader Thune for his leadership and commitment to ensuring the permanence of President Trump's pro-growth tax reforms, and applaud the lawmakers involved in driving this effort forward. We urge the U.S. House of Representatives to act swiftly and send the bill to President Trump's desk."

[Business Roundtable CEO Joshua Bolten](#): "Today's vote puts us on the cusp of extending and strengthening tax reform. Business Roundtable applauds the Senate for passing the One Big Beautiful Bill ... The House now has the opportunity to send a swift, decisive signal that America will remain a premier destination for business to invest, hire, and grow. We urge the House to act without delay and send the bill to President Trump's desk by the Fourth of July."

[Center for Transportation Policy Executive Director Jackson Shedelbower](#): "... it's clear that lawmakers are united in an effort to modernize the country's aging air traffic control systems. The \$12.5 billion that is appropriated in both versions of the package will be a strong down payment towards ensuring that the U.S. maintains its reputation as a global leader in air travel.

Lawmakers need to work out the remainder of their differences so the legislation can be swiftly pushed over the finish line.”

[CTIA—The Wireless Association President and CEO Ajit Pai](#): “CTIA applauds the Senate for passing the One Big Beautiful Bill, which includes a solid spectrum pipeline and smart tax provisions to support wireless investment. Along with restoring FCC auction authority, establishing a robust 800-megahertz pipeline of mid-band spectrum with a specific timeframe for action is critical to meeting growing consumer demand, securing U.S. leadership in 5G, and strengthening national and economic security. The bill’s targeted tax incentives will accelerate private investment in next-generation networks and support infrastructure deployment, job creation, and economic growth across the country. We thank Senate leadership, including Senate Majority Leader John Thune, Senate Commerce Committee Chairman Ted Cruz, and Senator Marsha Blackburn for their commitment to securing America’s wireless future, and we urge swift action to pass this legislation so President Trump can sign it into law.”

[Concerned Veterans for America Executive Director John Vick](#): “This legislation represents a win for American families, small businesses, and veterans across the country—groups that form the backbone of a thriving and resilient nation. This is a monumental moment for Americans who believe in hard work, opportunity, and service. The One Big Beautiful Bill Act sets the stage for lasting prosperity and a stronger future for those who have sacrificed the most.”

[Global Business Alliance President and CEO Jonathan Samford](#): “I applaud Chairman Mike Crapo, Leader John Thune and their Senate colleagues for advancing international tax policies that keep the U.S. the top destination for global investment. These provisions will help sustain American jobs, drive innovation, and reinforce a stable tax environment that attracts cross-border capital and world-class know-how. I urge swift House action and final passage of this One Big Beautiful Bill Act in order to secure America’s competitive edge.”

[Iowa Biodiesel Board Executive Director Grant Kimberley](#): “These improvements to the biomass-based diesel tax incentive come at a pivotal moment for the industry, which has seen months of uncertainty, stalled production and investment hesitation. Together with EPA’s proposed increase in Renewable Fuel Standard volumes—projecting more than 2 billion additional gallons of biomass-based diesel in 2026—the tax developments point to a significant resurgence in clean fuel demand. This gives us much-needed certainty for the near future.”

[Information Technology Industry Council President and CEO Jason Oxman](#): “The One Big Beautiful Bill will advance President Trump’s vision of ensuring America outpaces global competitors and remains the world’s leader in technology. We’re pleased to see the Senate

pass the reconciliation text with strong innovation-focused language that will empower companies to invest in America by restoring critical research and development expensing and stimulate economic growth and high-skilled job creation. We urge the House of Representatives to send this critical package to President Trump as quickly as possible.”

[Job Creators Network CEO Alfredo Ortiz](#): “By passing this tax cut bill, Republican Senators show once again that they are the party of Main Street. By expanding and making permanent the Tax Cuts and Jobs Act, including restoring full, immediate expensing, the Senate has delivered historic, pro-growth reform that can last for generations. These tax cuts empower small business owners to invest, hire, raise wages, and reinvest in their communities, ushering in America’s next Golden Age. On behalf of Main Street, JCN calls on the House to quickly pass this legislation and get it to President Trump’s desk by July 4, giving America the best birthday present it could ask for.”

[National Association of Home Builders Chairman Buddy Hughes](#): “NAHB commends the Senate for passing the One Big Beautiful Bill Act. This legislation will help spur economic growth and allow our members to invest more resources in multifamily rental construction, land development to build more single-family homes, and new equipment to expand their businesses. In turn, this will create a better business climate that allows builders to increase the nation’s housing supply, which is crucial to help ease America’s housing affordability crisis. We urge the House to move quickly to pass this bill.”

[National Association of Manufacturers President and CEO Jay Timmons](#): “The Senate just pushed the ball deep into the red zone. Now it’s the House’s turn to finish the drive and deliver a big win for manufacturers in America. The Senate advanced a tax package that will strengthen small businesses, family-owned operations and manufacturing workers across the country. It drives manufacturers closer to the goal line—growing businesses, creating jobs and powering stronger communities. After months of driving, months of endurance and effort, months of playing audacious offense and tenacious defense, months of partnership between manufacturers of every industry and our leaders in Congress and the administration, the House now can finish the job. We call on our partners in the House to send this bill to the president’s desk—the strongest tax bill for manufacturers we have seen in a generation. Because when Congress champions the 13 million people who make things in America, manufacturing wins—and when manufacturing wins, America wins.”

[National Business Aviation Association President and CEO Ed Bolen](#): “We thank the Senate for recognizing with this initial funding that a safe and efficient national airspace requires a robust, resilient ATC system that bolsters our nation’s global aviation leadership. As leading economists

have found, immediate expensing helps companies and entrepreneurs relying on business aviation have access to a critical competitive asset, while strengthening America's manufacturing base. These provisions represent an important investment in an essential American industry, and the citizens, companies and communities that depend on it. NBAA looks forward to their continued progress."

[National Cattlemen's Beef Association SVP of Government Affairs Ethan Lane](#): "The Senate version of the One Big Beautiful Bill protects family farmers and ranchers across the country from a massive tax hike at the end of the year, increases the Death Tax exemption, makes the Section 199A tax deduction permanent, increases the Section 179 tax deduction, funds foreign animal disease prevention programs, and delivers so many more wins for cattle producers ... It's time for the House to pass this bill and send it to President Trump's desk so he can sign it into law."

[National Corn Growers Association President Kenneth Hartman, Jr.](#): "NCGA has worked closely with members of Congress as they drafted and voted on this legislation. We are particularly pleased to see the permanent extension of certain tax provisions, which will provide more certainty to corn farmers around the country as they plan for the future of their businesses."

[National Cotton Council Chairman Patrick Johnson](#): "The NCC appreciates the momentous effort that has gone into crafting and passing the One Big Beautiful Bill. We are grateful for the Senate's commitment to delivering meaningful enhancements to the cotton safety net, which is absolutely critical for the stability and future of our industry."

[National Council of Farmer Cooperatives President and CEO Chuck Conner](#): "We commend the Senate for advancing permanent tax relief through the extension of Section 199A, a key priority for farmer co-ops that ensures they are not penalized for doing business together. Equally important are the provisions extending Section 179 expensing and the clean fuel production credit under Section 45Z, which provide producers and co-ops with the incentives and tools they need to innovate, invest, and lead the transition to a more sustainable agricultural future. We also appreciate the Senate's attention to the needs of production agriculture by updating reference prices and commodity title support to reflect today's economic realities. Combined with a significant increase in funding for market development programs, these provisions will help producers reach new markets and stay competitive amid global uncertainty. Now, it's time for the House of Representatives to act. We urge lawmakers to take up the Senate package without delay and send it to the president's desk before the July 4th recess. America's farmers can't afford to wait."

[National Council of Textile Organizations President and CEO Kim Glas](#): “On behalf of the U.S. textile industry, I would like to commend Senate leaders for including an important provision in the broader budget reconciliation bill that would permanently end de minimis for commercial shipments from all countries, effective July 2027. The Senate language mirrors a provision included in the House reconciliation package passed earlier in May ... We are also grateful that the Trump administration has already used executive authorities to end de minimis access for Chinese goods—which represent approximately two-thirds of all de minimis shipments—while also laying the groundwork to close de minimis to commercial shipments from all countries.”

[National Foreign Trade Council VP for International Tax Policy Anne Gordon](#): “We welcome Senate passage of the One Big Beautiful Bill ... We welcome the Senate’s decision to retain core international and business provisions of the Tax Cuts and Jobs Act in its version of the bill, as well as including permanent immediate expensing of research and development and reinstating depreciation and amortization in the interest deduction limitation. We are also pleased to see the Senate make permanent the look-through for controlled foreign corporations and provide other long-needed international tax fixes for U.S. corporations. As the House considers the revised bill, we encourage swift consideration and passage of tax legislation that incentivizes investment, innovation, and global opportunity for America’s job creators.”

[National Milk Producers Federation President Gregg Doud](#): “Dairy farmers are grateful for legislation that will create several key opportunities for dairy. Following last month’s successful vote in the House, we are excited that the Senate’s legislation also positions these investments to benefit dairy farmers and the cooperatives they own. We hope they are enacted into law as swiftly as possible.”

[National Mining Association President and CEO Rich Nolan](#): “We urge the House to quickly pass this bill, which increases the competitiveness of the American mining industry and provides vital incentives, including funding to counter China’s mineral dominance. The bill also makes improperly withdrawn lands available for energy production, which is key to supplying a reliable electric grid capable of powering our nation’s future. Through these measures, the bill will directly support U.S. economic growth and security. Mining feeds and fuels virtually every American supply chain; a strong mining industry creates an equally strong foundation for every industry that depends on the products and energy we provide. More can be done, and the NMA will continue to advocate with Congress and the administration on ways to support additional domestic mining, and mineral production and processing.”

[National Pork Producers Council President Duane Stateler](#): “We appreciate the efforts of Agriculture Chair John Boozman and other Senate leadership to ensure key animal health provisions were included in the bill, along with tax and other measures important to agriculture. Foreign animal diseases (FADs) threaten not only the livelihoods of pork producers but also our food supply chain at large. We thank our congressional leaders for these important steps to help keep our pork supplies safe, secure, and affordable for American families.”

[National Restaurant Association EVP for Public Affairs Sean Kennedy](#): “This bill includes the most important pro-growth tax policies restaurant operators need to continue to power the national economy. The inclusion of permanent policies for 199A qualified business income deduction, full expensing of capital investments, and the return of depreciation and amortization in the calculation of business interest expense will give restaurant operators working capital to invest in their businesses and employees. We are also pleased to see the inclusion of policies like No Tax on Tips and Overtime that will benefit our workforce. We appreciate the work that has gone into getting this bill through the Senate and encourage the House to quickly pass it, sending it to the President for signature.”

[National Roofing Contractors Association CEO McKay Daniels](#): “This legislation is critical to providing certainty for all businesses to continue to invest in their employees and grow their companies. In particular, the bill is a huge win for ‘main street,’ family-owned and pass-through entities that represent 95% of all U.S. businesses and employ the majority of private-sector workers. Without passage of this legislation, our industry will face rising tax burdens and diminished global competitiveness. Congress must act now to secure a stable future for America’s job creators.”

[National Small Business Association President and CEO Todd McCracken](#): “NSBA applauds the Senate for passing H.R. 1, the One Big Beautiful Bill Act which includes NSBA’s #1 priority, permanency for the small-business tax rate cut in the form of the 199A Qualified Business Income deduction. Enacting this provision and several others—including reversing a very problematic change to the R&D tax deduction—is a major win for small business. As our nation celebrates Independence Day, I urge the House to pass the language approved in the Senate and give America’s small businesses the freedom and independence they need and deserve to keep their businesses thriving.”

[National Sorghum Producers Chair Amy France](#): “These are critical improvements that will help sorghum producers manage risk, plan for the future, and stay competitive. We’re grateful to

Chairman Boozman and other leaders in the Senate Ag Committee who ensured these priorities were part of the final bill.”

[Nuclear Energy Institute President and CEO Maria Korsnick](#): “We applaud the U.S. Senate for advancing policies that recognize the important role of nuclear energy to achieve a reliable, affordable and increasingly clean energy system. The Senate version of the budget reconciliation bill restores the nuclear power production tax credit through 2032, and the tax credits for new nuclear generation through 2033, with transferability retained for both. The Senate version also preserves the viability of the Loan Program Office by extending the program’s authority and funding from 2026 to 2028, although the appropriation of \$1B is less than available under current law. Maintaining the tax provisions in the Senate bill will continue to address economic hurdles and provide confidence to invest in today’s nuclear plants, while securing long-term, well-paying jobs. Further the bill allows us to continue down the path to achieve the Administration’s ambitious goals for deploying new, cutting-edge nuclear technologies that will meet the growing demand for more reliable energy.”

[Philanthropy Roundtable COO Elizabeth McGuigan](#): “Now more than ever, we need a strong, vibrant civil society. Government spending is shrinking – which is a good thing – and generous Americans are ready and willing to support causes and communities around the country. We’re especially grateful for the leadership of President Donald J. Trump, whose pro-growth, pro-America agenda continues to inspire strong economic stewardship. We encourage the House to pass the Senate bill quickly and without changes.”

[RATE Coalition Executive Director Dan Combs](#): “Today’s vote is a major win for workers, businesses, and the American economy as a whole. By preserving the 21 percent corporate tax rate, the Senate has reaffirmed its commitment to a competitive tax code that drives investment, fuels job growth, and ensures the U.S. remains the best country in the world to start and grow a business. We applaud this strong, pro-growth action and urge lawmakers to expeditiously finalize the legislation and send it to President Trump’s desk without delay.”

[Small Business & Entrepreneurship Council President and CEO Karen Kerrigan](#): “We commend Republican Senate leaders for their tireless work in getting the ‘One Big Beautiful Bill Act’ to this critical stage for America’s small business owners and entrepreneurs. Their commitment to advancing this powerful package shows incredible dedication to the success of Main Street businesses across the country and to the future of U.S. entrepreneurship. Now, House members must focus on the widespread gains in the legislation for the U.S. economy, workers, families, and small business owners. We urge the House to promptly pass the bill so it can be signed by President Trump.”

[Steel Manufacturers Association](#): “Congratulations to the @SenateGOP for passing H.R. 1! The bill will make historic investments in Americans, our workers, our communities and our economy will all benefit.”

[The LIBRE Initiative President Daniel Garza](#): “We commend the Senate for passing H.R. 1 to make the Trump tax cuts permanent—measures that have proven to deliver real benefits to hardworking families, job creators, and entrepreneurs across the country. For Latinos—who are starting businesses at a notable rate and powering local economies—this bill is not just good policy, it’s essential. By making the low tax rates and small business provisions permanent, this legislation helps ensure that Latino workers, small business owners, and families can thrive with greater certainty, flexibility, and opportunity. Tax relief allows families to keep more of what they earn, invest in their future, and weather economic uncertainty with confidence. We applaud the Senate for sending a clear message that the American Dream remains alive and within reach for all—especially those working hard to build a better life.”

[U.S. Chamber of Commerce EVP and Chief Policy Officer Neil Bradley](#): “With today’s vote, the Senate has taken decisive action to deliver the kind of permanent tax relief the American business community has been calling for. The tax provisions included in this bill will not only drive economic growth and sharpen America’s competitive edge but also put more money in workers’ pockets, increasing prosperity in communities across the country. The Chamber thanks Leader Thune, Chairman Crapo, and all who are working to make the pro-growth reforms of the 2017 Tax Cuts and Jobs Act permanent, including the deduction for domestic R&D expenditures, 100% bonus depreciation for certain business investments, and an expanded business interest limitation. The Chamber applauds the Senate for voting to make these provisions permanent features of the tax code. We urge lawmakers to swiftly pass the OBBBA and deliver it to President Trump to be signed into law.”

[USA Rice Farmers Chair LG Raun](#): “USA Rice applauds the Senate for passing the OBBB Act including a historic and critical investment in the farm safety net. We urge the House of Representatives to take up and pass this bill with the key ag investments before the 4th of July.”

[Wine & Spirits Wholesalers of America President and CEO Francis Creighton](#): “On behalf of the Wine & Spirits Wholesalers of America, I want to thank the United States Senate for passing President Trump’s One Big Beautiful Bill Act under Section 198A. This critical legislation empowers America’s family-owned wholesalers to reinvest, compete, and thrive. We urge the U.S. House to act swiftly and send this bill to the President’s desk without delay.”
